PLEASE NOTE: To minimise twisting and warping all garden furniture products are recommended only be used on firm level ground. Softwood is a natural material, which can twist and split during periods of wet/dry, hot/cold weather. If cracks do appear, it is a natural occurrence and not a fault with the product or material. The best way to treat this is to use a cloth and rub a little PVA wood glue into the crack, once dry sand the area lightly. This will not affect the treatment of the product.
